

MANHATTAN

HEALTHCARE SOLUTIONS

About Us

For almost 12 years, Manhattan Healthcare has been in the international healthcare market with the invariable goal of creating optimum healthcare facilities where we provide counselling and a pool of healthcare services.

Manhattan Healthcare assists clients in delivering high-caliber, integrated solutions for infrastructure and operation of healthcare facilities.

From planning through design to selection and delivery of equipment to construction, Manhattan Healthcare covers the full sphere of healthcare services. Smart thinking is the approach Manhattan Healthcare always takes through the entire life span of a project where cost effectiveness, timely delivery, high quality and risk management are the goals of our business.

Who We Are

Manhattan Healthcare is a subsidiary of Manhattan Ltd. Manhattan Healthcare is an international development company committed to global health sector development and growth.

We hold expertise in healthcare, technical, engineering and soft skills which help governments and multilateral agencies to implement long term projects and achieve targets.

Our procurement, engineering and supply chain services, along with solid financial backing, help ensure that wealth generated is spent or invested for the good of all.

Core Expertise

1 - Planning

Vigilant planning is essential for project success. It takes any project through counted steps into a safe zone. In addition, it ensures that any project is not only completed on time and within budget but fully achieves its intended purpose.

Conceptual/feasibility planning.

When potential capital projects are being contemplated, we define needs, develop a high-level program, test-fit floor plan alternatives, and study critical implementation issues.

- Existing Conditions Assessment
- Strategic Planning Coordination
- Master Plan Program Development
- Master Facility Plan
- Project Scoping & RFP Development

Core Expertise

2 - Engineering

- Professional, multi-skilled engineering team
- Collaboration to tap our partners' core expertise
- Systematic planning and workflow for project success
- Specialized in Civil and Structural Engineering, Mechanical Engineering, Electrical and Control Engineering, Medical Gas Engineering, Process Engineering.

Our team consists of professional engineers supported by experienced technicians with a depth of knowledge in delivering all aspects of healthcare engineering services such as design layout, contracting and construction supervision.

As most projects require multifarious skills and technical inputs, we adopt a corporate policy to utilize our partners' core expertise through a comprehensive collaboration model to achieve project success.

Core Expertise

3 - Healthcare Equipment

- We keep you abreast of healthcare technology
- Manage and control purchase, inventory and costs of equipment and furniture
- Plan, commission and install equipment in specialized healthcare departments

The challenge faced by hospital executives today is to gain the management and control required to make effective equipment planning decisions. Implementing the established systems developed by Manhattan Healthcare has facilitated success in this area. The Manhattan Healthcare advantage in equipment planning and procurement management

Core Expertise

4 - Project Management

- Flexible and responsive project management team
 - Collaborative effort with client to reduce costs, induct new technology, optimize resources
 - Simple to highly complex projects handled with professionalism and expertise
- Manhattan Healthcare's proven project management support techniques provide a framework for project success by managing risks, forecasting problems, controlling time, costs and quality.

At Manhattan Healthcare, the use of project management support techniques provides better initial planning and assessment of risks.

This provides a greater chance of forecasting problem areas while there is still time to take corrective action and allows flexibility for alternative modes of operation.
